

WHAT WE DO

Harvey's focuses on the needs of the central Michigan grower. We specialize in custom recommendations for your farm. From feed rations, crop fertility, seed choices, GPS soil testing or custom application of chemicals and fertilizer, our sales and support staff are ready to assist you in your farming venture.

Harvey's stays up to date and knowledgeable about the new products available to farmers. Every year we plant an extensive research plot to test the new products and varieties available.

Contact the number below with any of your questions or needs. The Harvey's team is committed to supplying product, services and knowledge to their customers

Harvey's Agricultural Solutions

Products and
Services

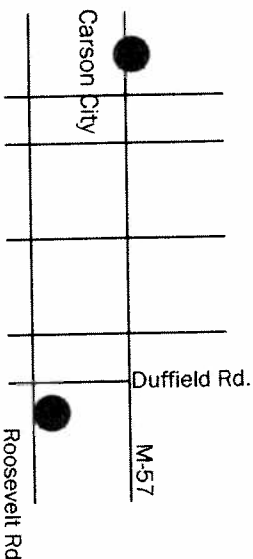

60 Years of Helping Central Michigan Farmers Grow

For 60 years Harvey's has been growing, diversifying, and serving Michigan growers. With over 60 employees, we are one of the remaining independent dealers in Michigan, a testament to our loyal customers' support.

Location

Our feed and store operations are located in downtown Carson City, on M-57, at the edge of Montcalm, Gratiot, Ionia and Clinton counties. Our seed, fertilizer and chemical operations are located 3 miles east and one mile south of town.

Feed Support

We are proud to be one of the largest dealers in the United States for ADM Alliance Nutrition.

ADM's expertise in feeding animals has helped us grow our feed business while inclusion rates on dairy farms have decreased. ADM support staff helps us solve customer problems, formulate cost rations, and plan dairy expansions.

Site Specific Agronomy

Getting the most out of your crop means putting fertilizer in the right amounts to the right location. We offer grid soil testing to identify areas where nutrients are out of balance with yield potential. Using GPS, we can variable rate fertilizer and lime to balance your soil fertility levels and maximize yield potential.

Crop Protection

We have a different philosophy when it comes to selling farm chemicals. Too often the focus is on price alone, not value. Harvey's is committed to offering a variety of solutions to your pest problems. You can balance cost, convenience, crop safety, performance guarantee and efficacy with your needs. As an independent, we can offer the best solution from a variety of vendors. We also offer custom application services.

Specialty Products

Proper plant nutrition is critical for yield and feed value. We offer tissue testing and foliar feed products as well as traditional dry and liquid fertilizer. Our prescription approach to your operation will help maximize yield potential and fertilizer efficiency.

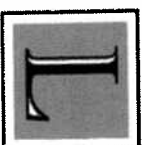

Record Keeping

Harvey's Farm Cycle™ is the "less hassle" method of nutrient record keeping for dairy and other livestock operations. Farm Cycle tracks all field applications and crop removals. It provides a field and whole farm nutrient balance report for permit purposes as well as for agronomy management.

Seed Expertise

Harvey's is one of the largest seed dealers in Michigan.

LEGACY SEED

Other brands may also be available

We can help you choose the right brand and variety for your fields.

Along with corn, wheat and alfalfa, we offer bulk soybean seed that can be picked up or delivered to your farm, custom treated with CruiserMaxx, ApronMaxx or Optimize inoculation.

Harvey's Farm Cycle® — The system for farm nutrient accounting

Challenging

Today's livestock producer deals with many daily challenges. One is the continued protection of the environment from nutrient build-up due to manure applications. Proper record keeping is essential for monitoring soil nutrient levels and maximizing the value of manure as a resource.

Simple

Harvey's Farm Cycle® provides an easy format to track and document manure applications, pesticide use, fertilizer use, crop yields and other information necessary for your CNMP, MAEAP, NPDES, and GAAMP.

Convenient

Harvey's Farms Cycle® system will document all manure, fertilizer and pesticide applications, animal and feed imports, crop, milk and animal shipments each month with a one-hour interview.

Detailed

With your input, Harvey's Farm Cycle® will track field by field and whole farm balances of nitrogen, phosphorus and potassium. Keep your farm nutrient records up to date with Harvey's Farm Cycle®.

Harvey's Farm Cycle® -

Total Farm:

- Nutrient balances N, P, K
- Crop nutrient values
- Manure nutrient values
- Feed nutrient values
- Pit freeboard levels

"Farm Cycle" Total Field

- Levels of N, P, K
- Manure application details
- Pesticide application details
- Soil test levels
- Crop planting details
- Fertilizer use
- Nutrients removed by crop

Let Harvey's Farm Cycle® take the hassle out of nutrient record keeping. Contact your Harvey's Farm Cycle® consultant at 989-584-3466
